

AHMED ZAYAN

Flutter Developer — Mobile Applications (iOS & Android)

Cairo, Egypt | +20 112 982 0937 | ahmedzayan025@gmail.com
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Flutter Developer with 3+ years of experience shipping production mobile apps for companies and remote clients. Published 11 apps on the App Store and Google Play serving 10,000+ users, including ride-hailing, marketplace, and real-estate platforms. Strong in BLoC, Clean Architecture, performance optimization, payment integrations (Apple Pay, Stripe, Paymob, HyperPay), CI/CD, and the full store release cycle. Experienced in fully remote, end-to-end delivery within Agile/Scrum teams. Open to remote full-time or part-time roles.

CORE COMPETENCIES

Clean Architecture · SOLID Principles · State Management (BLoC/Cubit) · Dependency Injection · Performance Optimization · REST API Integration · Firebase · Store Publishing · CI/CD · Agile / Scrum · Git Flow

TECHNICAL SKILLS

Mobile: Flutter, Dart, BLoC/Cubit, MVVM, Clean Architecture, Method Channels, Native iOS Integration, Flutter Web

Payments: Apple Pay, Stripe, PayPal, Paymob, HyperPay, SAF

Backend & APIs: RESTful APIs, Firebase (Auth, Firestore, Cloud Functions, FCM), Postman

Data & Storage: SQLite, Hive, ObjectBox, Shared Preferences, Flutter Secure Storage

DevOps & Release: CI/CD, GitHub Actions, App Store Connect, TestFlight, Play Console, App Store Review process

Other: Google Maps, Push Notifications (FCM), Localization (Arabic/English), Git, Git Flow, GitHub, Android Studio, VS Code

PROFESSIONAL EXPERIENCE

Flutter Developer — Nahrdev (nahrdev.com), Cairo, Egypt

Jul 2023 – Present

- Designed, developed, and maintained 10+ production Flutter applications on iOS and Android serving 10,000+ users, including a marketplace app rated **4.7★ on Google Play**
- Architected apps using BLoC/Cubit, Clean Architecture, SOLID principles, and dependency injection
- Integrated payment gateways including Apple Pay, Stripe, Paymob, HyperPay, and SAF
- Bridged Flutter with native iOS features using Method Channels (native iOS integration)
- Set up CI/CD pipelines with GitHub Actions to automate builds, testing, and releases
- Owned the full release cycle: App Store Connect, TestFlight beta distribution, Play Console, and the App Store review process
- Mentored junior developers and led code reviews, raising code quality across the team

Freelance Flutter Developer — Remote Clients (part-time alongside main role)

Nov 2022 – Present

- Delivered complete mobile apps end-to-end: requirements analysis → UI implementation → API integration → store publishing
- Implemented authentication, payments, maps, push notifications, and Arabic/English localization

FEATURED PROJECTS

All apps published — direct store links available on [my portfolio](#)

- Octoboss + Octoboss Labor** — On-demand home services platform (customer + worker apps) · App Store
